Abdullah **Ali**

AI/ML ENGINEER

(+92) 313-4039492 | abdullahaliofc@gmail.com | AbdullahAli | Abdullahali | Abdullah.dev

Summary

AI Engineer experienced in designing and deploying AI Agents, Advance RAG systems, and intelligent applications using LLM frameworks.Skilled in Transformers, CNNs, NLP, and TensorFlow, building scalable, production-ready solutions with Python, FastAPI, and Docker. Proficient in MLOps, MLflow, CI/CD, and AWS, with a focus on developing multimodal AI systems solve real world problems.

Tools & Technologies

- **Languages & Libraries:**
  Python – SQL - LangChain - LangGraph - LangSmith - MCP (Learning) - Tensorflow - Scikit-learn – NumPy – Pandas – Matplotlib – FastAPI - Pydantic - Optuna
- **AI & Machine Learning:**
  Agents - Advance RAG - LLMs - FineTuning - Transformer - NLP - HuggingFace - Ollama - ANNs - Supervised & Unsupervised Learning - Hyperparameter Tuning – Model Evaluation – EDA – Feature Engineering
- **MLOps & Software Tools:**
  VSCode - Git - Github - MLflow - Apache Airflow – Docker - MySql – Postgres – CI/CD – EC2 – S3 - ECS - Lambda - IAM – CloudWatch

Experience

NETSOL TECHNOLOGIES

Lahore, Pakistan

AI/ML Trainer

Aug 2026 - Oct 2026

- Built and evaluated ML & RAG sol, developing data pipelines, retrieval workflows, & agentic AI systems
- Worked on data preprocessing, feature engineering, model evaluation, and visualization while developing agentic AI workflows
- Gained experience in the ML lifecycle, from data preparation and model development to containerized deployment & monitoring.
- Applied model interpretability and monitoring to evaluate model performance and support reliable ML workflows.

Tools : Python, LangGraph, LangChain, FastAPI, Streamlit, FAISS, Gemini, Ollama, SQLite, Docker, AWS EC2, JWT.

Projects

NexusAI — Agentic RAG Assistant | GitHub

- Built an agentic RAG AI assistant that determines intent, selects tools, and performs multi-step reasoning to answer questions using uploaded documents, YouTube content, web information, and external data.
- Engineered hybrid RAG combining semantic and keyword retrieval for context-grounded answers across multiple documents, YouTube content, and web/blog sources.
- Implemented JWT auth, user-isolated data, persistent SQLite memory, and secure API services.
- Developed a multi-user platform with persistent and isolated workspaces; containerized and deployed on AWS with Docker.

Tools: Python, LangGraph, LangChain, FastAPI, Streamlit, FAISS, Gemini, Ollama, SQLite, Docker, AWS EC2, JWT.

Network Security Detection | GitHub

- Developed an end-to-end machine learning system for phishing website detection using 30+ engineered features.
- Achieved 98% accuracy using a tuned Random Forest model after comparing multiple classification algorithms.
- Built modular data ingestion, validation, transformation, and training pipelines with MLflow, DVC, Docker, and AWS.

Tools: Python, Scikit-learn, FastAPI, Streamlit, MLflow, DVC, Docker, AWS S3, EC2, GitHub Actions, MongoDB Atlas.

Certifications

- **Complete Agentic AI Bootcamp** *(Certificate)*
- **Complete MLOps Bootcamp** *(Certificate)*
- **Machine Learning A-Z** *(Certificate)*

Academics

Virtual University of pakistan

Lahore, Pakistan

Bachelor in Computer Science

Apr. 2022 - Jun. 2026
