Summary

With over 6 years of experience as a Full Stack Engineer, I possess strong leadership, communication, and problem-solving skills using TDD (test-driven development). I excel at guiding teams to success through effective teamwork, and collaborating closely with colleagues and stakeholders. My ability to efficiently resolve complex issues contributes to significant cost savings and improved project outcomes. Beyond technical expertise, my enthusiasm drives community contributions while maintaining a focus on professional growth.

Tools and Technologies

- **Software Tools**
  VSCode - Git - CI/CD - S3 - AWS - CloudFront - Azure DevOps - Jira - Bitbucket - GitLab - GitHub - Atlassian - Scrum - Agile - kanban
- **Frameworks And Libraries**
  JavaScript - TypeScript - HTML - CSS - SCSS - ES6 - JQuery - JavaScript (ES6) - Tailwind CSS - React JS - React Native - Next JS - Node JS - Web3 - Three JS - Ether JS - Moralis - Tailwind CSS - Webpack - Storybook - Cypress - GraphQL - React Query - Redux - Rest Api
- **Testing**
  Selenium - Puppeteer - TestCafe - Mocha - Enzyme - Storybook (for component-driven development) - Playwright

Experience

Systems Limited

Lahore, Pakistan

Senior Software Engineer — *Jun. 2023 - Current*

- Leading frontend team of 10 engineers and built scalable web app with react.js, serving **50K+ users**.
- Transformed designs into **user-friendly interfaces**, improving satisfaction rates of 50k+ users.
- Utilized **Storybook** for efficient UI component **development and testing**, improving development workflow and code reusability.
- Implemented Unit, Integration, and **E2E testing** using Jest and **Cypress**, ensuring robustness and reliability.
- Worked closely with backend team on the Signal platform that is scrapping **1,000,000** of records via crone jobs and I implemented narrative builder based on those ai and ml models.
  Tools: next js, graphQL, RTK Query, tanstack Table, jest, cypress, ai, ml, rest API, storybook ui, and tailwind css.

Tkxel

Lahore, Pakistan

Mern Stack Engineer — *Jun. 2022 - Jun. 2023*

- Developed in browser racing game with **Three js**.
- Developed **Metaverse Landsale** that includes **minting** of in-game assets.
- Develop the web solution for metaverse-based racing game on **blockchain** handling **Ethereum and Cardano blockchain**.
- Managed light operations on a readily set DevOps environment using S3, **Coudfront**, Kubectl, Lens, **AWS**.
  Tools: dapp, web3, ethereum, cardano, three.js, kubectl, aws, s3, cloudfront, aws lens, smart contract integrations, next.js, node js, mongoDb, react query, react, ci/cd, front end, project management, back end, react hooks, custom hooks, lambda, zod, and tailwindcss.

Trango

Manchester, UK

Frontend Developer — *Jan. 2019 - Jun. 2022*

- Worked on communication tool based on **WebRTC** for **AudioVideo calling and File sharing**
- Built a stable product and tested on **200 concurrent users** simultaneously on video conference.
- Worked on integration of open-source platforms using **DDP protocol** i.e. **Rocket Chat**.
  Tools: webrtc, DDP, sfu JANUS, rocket chat, redux toolkit, rtk Query, graphql, yup Validation, storybook UI, node.js, javascript, typescript.

Personality

Problem solver - Team player - Effective communicator - Continuous Learner - Customer-Focused Approach

Academics

Air University

Islamabad, Pakistan

B.S. in Computer Science and Engineering — *Apr. 2016 - Jun. 2020*
